- Why Choose Full Stack Development?

About me

Hello, My Name is Harshdeep. I am Python-Full Stack Developer. Recently I have completed my graduation in Bachelors of Technologies (Mechanical Engineering). Also, I have completed my certification in Python-Full Stack Development from Tops Technologies. I am from Rajasthan. But I currently live in Ahmedabad and we are 5 members in family. I believe in my hardworking nature; I can do anything if asked to do it. Apart from that I like travelling, plantation, reading Technical Books.

That's about me, Thank You

HR Questions

- Why you choose IT Field?
- Talk About IT Field
- Discuss latest trends in IT.
- Skills
- What are your strengths and weakness?
- How you will convert weakness into strengths.
- Goals -> Short-Term and Long-Term

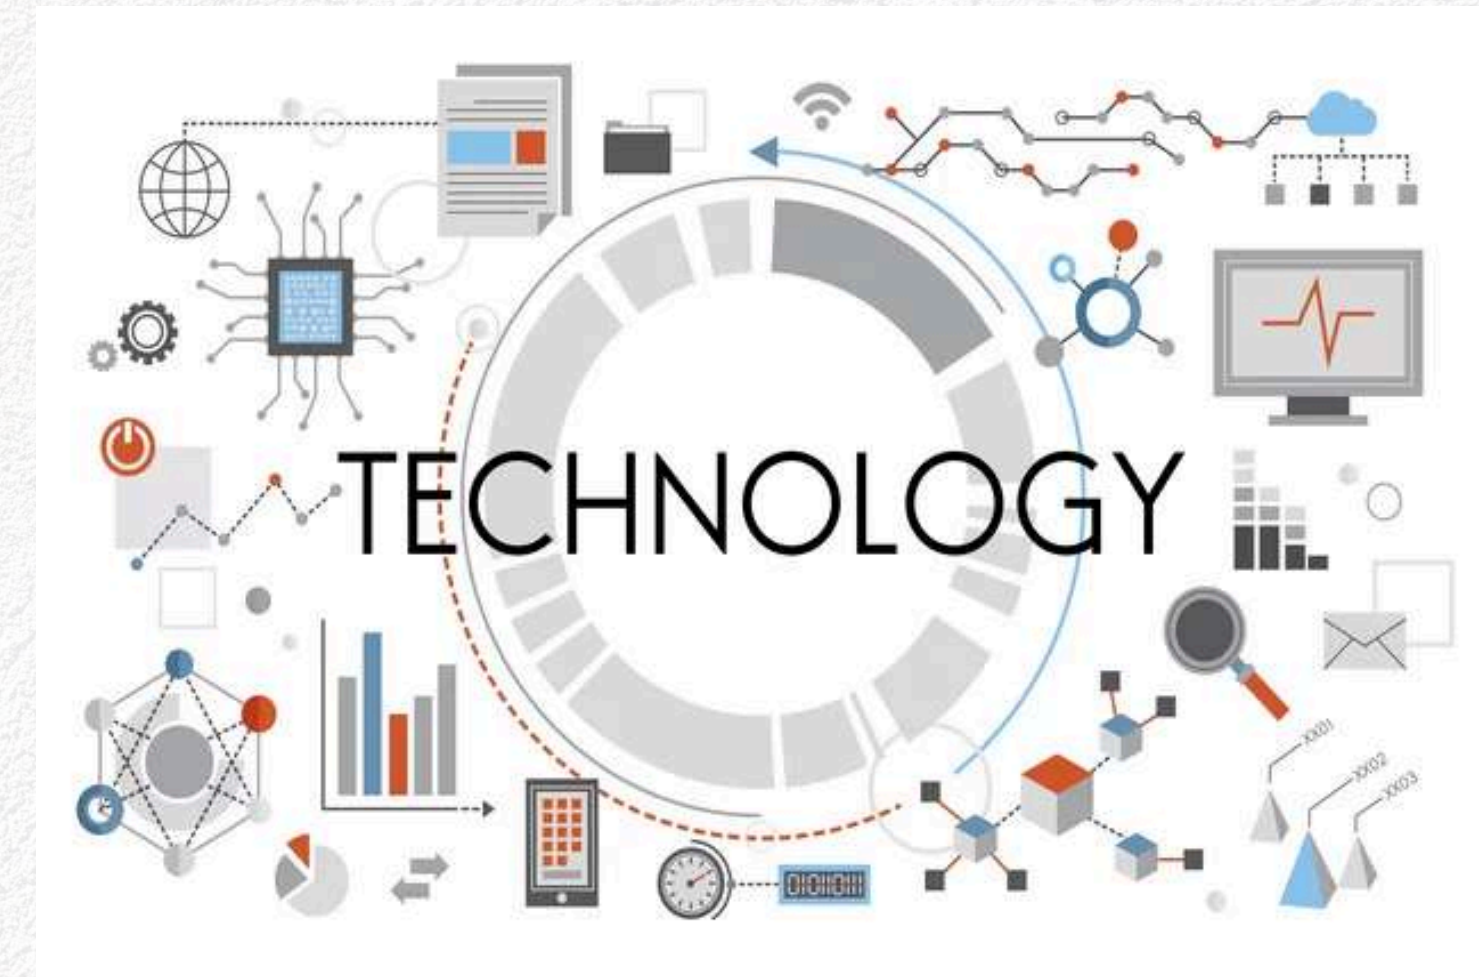

Why you choose IT Field?

- Initial knowledge of c++, database coding increased my liking for the it industry and I enrolled myself for B.tech followed by full stack certificate course and that's why I joined IT industry.
- IT sector can serve as best option for my career due to its increasing demand, multiple career options, work life balance and merit based system.

Talk About IT Field

The field of information technology, or IT, covers the support, administration, and design of telecommunications and computer systems. Some positions in this field include system analysts, software programmers, computer scientists, computer support specialists, and network and database administrators.

Latest trends in Full-Stack Development

Goals

SHORT TERM GOALS -

- Limit social media screen time to 30 minutes per day, or get off screens by 9:00 p.m. everyday for a month.
- Complete one continued online course or training program per month.
- I will spend 45 minutes updating my resume every Sunday for 4 weeks.

LONG TERM GOALS -

I envision myself as a Team Leader where I am leading a team, solving problems and giving best of the results with my performance and knowledge.

Why Choose Full Stack Development?

A full stack developer can make a fully functioning web application.

These website developers have some knowledge of both the back end (server side) and front end (client side). Full stack developers need little or no outside help in their work. This makes them especially valuable to employers.

THANK YOU
